

Building Permit Inspection Changes
Updated 3/26/20
Dave Geraths, City of Edgerton Building Inspector
(608) 697-7776

In accordance with the Governor's "Safe at Home Orders", General Engineering Building Inspection Department will continue to perform building inspections and issue building permits as staffing permits. However, our inspectors will avoid entering occupied homes for interior remodels or any other interior projects where doing so may compromise their safety. Therefore, the inspector will accept sufficient photos or video evidence in order to approve the project when the health-safety of our inspectors may be at risk. You may continue to contact your lead building inspector by cell phone or email.
