

CAREFUL WHAT YOU FLUSH!

IMPORTANT MESSAGE FROM THE WASTEWATER UTILITY

An important reminder from the City's Wastewater Utility: "Likely due to the COVID-19 situation, the Wastewater Treatment Plant has noticed increases in disinfecting wipes/paper towels and other items coming into the facility. These wipes should not be flushed into the sewer.

Sanitizing wipes labeled 'flushable' have been problematic to sewer systems across the world. This includes cleaning wipes such as "Clorox" sanitizing wipes and others. Flushing these wipes results in costly repairs needed in the sewer system.

Please dispose of these wipes/paper in the regular trash.
